

Glow Season!

Celebrate the Season – Moms, Grads & Glam!

Welcome! **Atlanta Medispa & Physicians Aesthetics** is your trusted destination for weight loss, wellness, and aesthetic care. Led by Dr. Atkins, a respected expert, we provide personalized treatment plans in a supportive, aesthetic environment.

Whether you're looking for Botox, lip and dermal fillers, or advanced hair transplant procedures, we're here to help you look and feel your best—with expert, results-focused care every step of the way.

What's New?

\$10 Botox Tuesdays Now on Thursdays

By popular demand, our \$10 Botox Tuesdays in East Cobb have now been extended to include Thursdays as well! That means more flexibility for you to refresh and rejuvenate—at the same great price.

Welcome Back, Sydney!

We're thrilled to announce that Sydney has returned as our Operations Manager. Her warmth, experience, and dedication to patient care make her an invaluable part of the Atlanta Medispa family. We're so happy to have her back!

Exclusions Apply

How to Book?

After a small hiccup, our phone lines are back up and running, and we're ready to assist you. Patients can now book appointments either online or by calling the clinic directly.

Whether you have questions about treatments or need to sign up for our membership, our team is here to help you stay on track with your treatment.

Ozempic's Back — But the Rules Have Changed

The FDA is cracking down on compounded versions of semaglutide. These custom-mixed alternatives are now considered *illegal* unless very specific conditions are met, due to safety concerns. For patients using Ozempic for weight loss, this means a shift back to FDA-approved medications only.

Locally, Dr. Atkins, a trusted physician in weight loss medicine, is ensuring that **our patients will continue to have access to safe, approved Ozempic** through established pharmacy partners. "Our priority is your health and making sure your treatment stays on track," Dr. Atkins said.

Patients are encouraged to reach out with questions or for help transitioning away from compounded medications.
